

There are so many fun choices that help you outside of school such as driving theory practice and volunteering. It took most of the stress away and helped me pass my driving theory first time! There are always fun activities to do too, like Curly Wurly bingo!

Sixth Form offers so much support outside of lessons with teachers always happy to help.

Lily

JC6

Since starting Sixth Form, I have enjoyed having my own independence in comparison to main school.

I have been able to complete my projects at my own pace and with precision which has meant I have never been overwhelmed with work.

As well as that, one of the best and most enjoyable parts of Sixth Form for me has got to be the team building activities that all students get involved with. They have ultimately made for great teamwork and innovation and meant that I have bonded with people I wouldn't usually have interacted with. As a result I've made great friends.

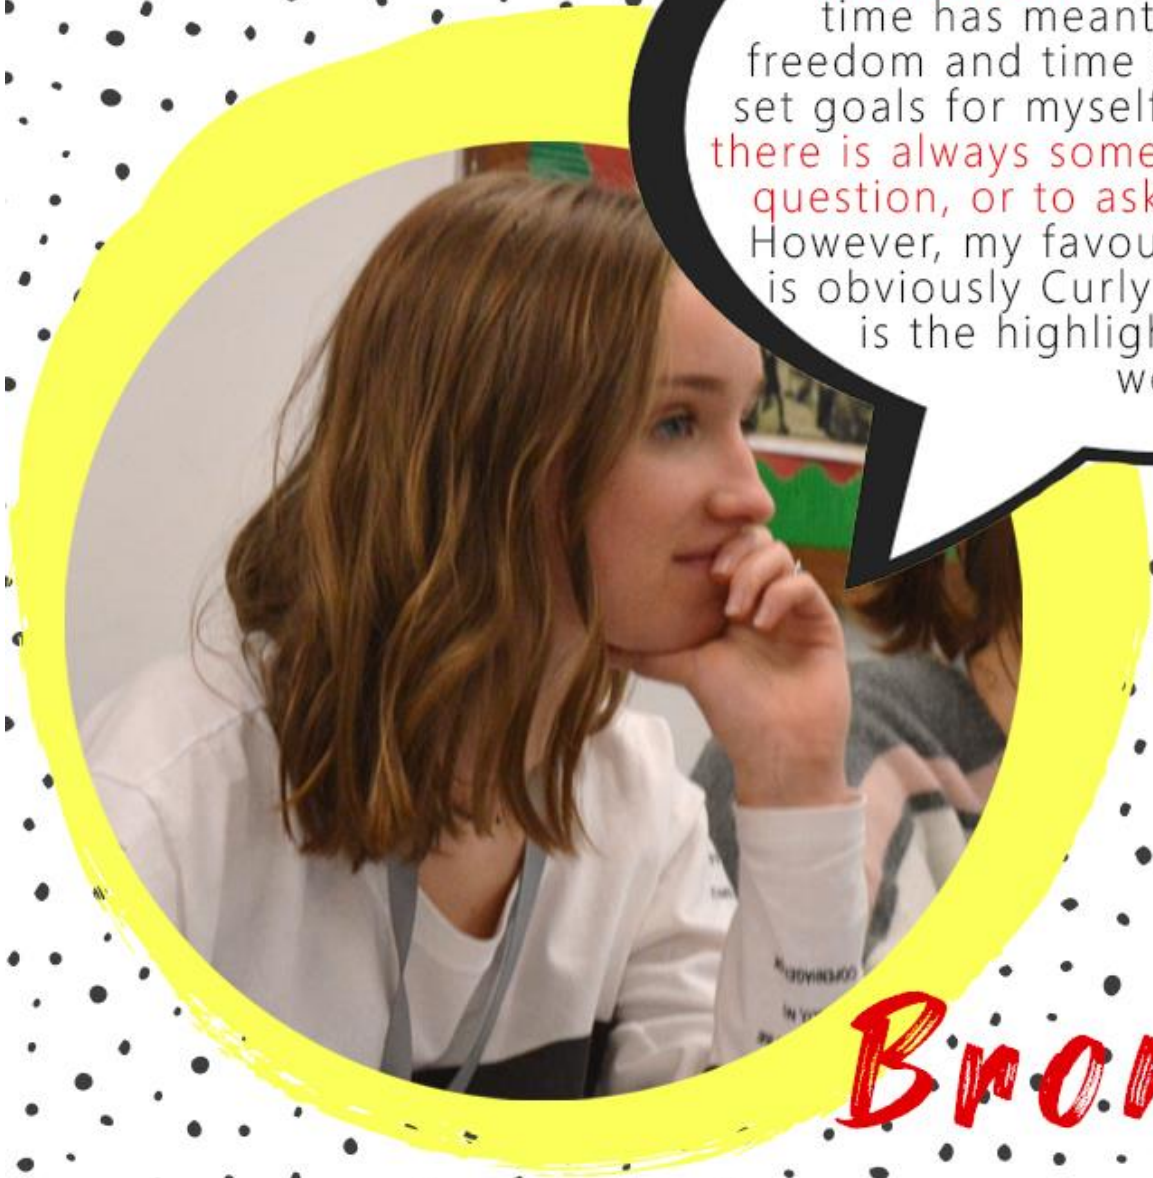

*David* **JC6**

My first year at JC6 has been great! I have met many new and amazing people and taken part in some of the various opportunities given to us throughout the year. My personal highlight of the year was the Christmas Bazaar.

A-Levels have allowed me to focus more on the things I am interested in. Independent study time has meant that I have more freedom and time to work on tasks and set goals for myself. In sixth form I know there is always someone to answer a quick question, or to ask for help in general. However, my favourite part of 6th form is obviously Curly Wurly bingo, which is the highlight of everyone's week!
